

# Past Informing the Present Past Improving the Plan For a Rad/Nuc Incident

RITN is led by the National Marrow Donor Program and American Society for Transplantation and Cellular Therapy, with essential support from the US Office of Naval Research.

**August 4-5, 2022**

*(On-site registration opens at 7:30 am on August 4)*

The Westin Alexandria Old Town | 400 Courthouse Square, Alexandria, VA 22314

The Radiation Injury Treatment Network seeks to increase the understanding of and preparedness for the medical, environmental, and psychological consequences of a mass casualty radiological/nuclear incident for healthcare professionals. The 2022 RITN workshop will (1) highlight recent developments in Covid pandemic response and applicable lessons we have learned, (2) review innovations in novel radiation countermeasures and dosimetry, (3) discuss optimizing triage and on the ground federal resources, (4) present strategies to ensure the availability and appropriate use of medical and supportive care and resilience, and (5) explore applying telemedicine as a force multiplier for care and education. Additionally, the workshop will encourage open sharing of lessons learned from past efforts.

## EDUCATIONAL OBJECTIVES

- 1) Explain the challenges and new developments concerning patient transport, assessment and triage in pandemic response and review federal resources.
- 2) Discuss progress in research on radiation-specific countermeasures and injury, individual bio-dosimetry, and supportive care during mass casualty radiation emergencies.
- 3) Discuss challenges in effective communication during a health emergency and the role of subject matter experts.
- 4) Describe the importance and key challenges of operational planning and providing medical and supportive care following a radiation/nuclear incident and how to improve resilience.
- 5) Understand how technology has presented a virtual alternative environment for clinical and educational platforms.

## TARGET AUDIENCE

Physicians and other healthcare providers, support staff, hospital and hospital system administrators, emergency managers, research scientists, and appropriate federal agency staff involved in radiation response and treatment of patients with radiation-induced bone marrow injury are invited to attend.

**Attendee Registration:** <https://www.eventbrite.com/e/2019-ritn-workshop-tickets-53699058329>

- \* General Attendee (\$250)
- \* Government and Non-Profit Attendees (\$150)
- \* RITN Affiliated Attendee (\$100)

**Exhibitor Prospectus:** <https://ritn.net/WorkArea/DownloadAsset.aspx?id=17179869279>

- \* General Exhibitor (\$500)
- \* Government and Non-Profit Exhibitors (\$250)

## Hotel Accommodations:
