

# Paucity of Capacity in Rural Georgia

- While there may be beds in aggregate - there is limited complex care availability
- Geographic isolation in many locations in Georgia

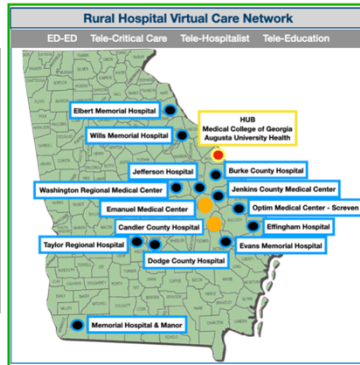

## GOAL

- Increase “on-demand” capability to provide complex care outside of Metro areas
- Increase surge capacity
- Maintain a “readiness” status through routine use of system and processes

Complex Care Providers

Surge Capacity

Telemedicine

Mobile (Deployable) Capability  
for Tele-Complex Care

Increased Telemedicine  
Connectivity in ED's

Increased Monitoring Capability  
@ 2 rural “orange” hospitals

Real-Time Connectivity  
Expertise and Specialty Care

Deployable  
Complex Care  
Capability  
(POI/Role1)

On-Demand  
Complex Care  
Capability  
(Role 1)

Rural  
“Referral”  
Location  
(Role2)

Tertiary  
Medical  
Center  
(Role 3)
